

Shipment of Reactor

Belleli Energy CPE has recently concluded the fabrication the last of four reactors destined for a new refinery in Taiwan. It is the biggest reactor ever fabricated in Mantova and one of the biggest ever manufactured worldwide. The thickness of the pressure retaining parts is more than 300mm, the dia. approx. 4 mt. and the total weight approx. 1200 metric tons. With this excellent result, Belleli Energy CPE can confirm its position amongst one of the top five companies in the world capable of producing such complex equipment.
